                                  Q2 6 💆 🖭
```

Approach:

- 1. First I creating Card component and Button component
- 2. Next these two components are reused multiple times in page.js by creating card component as shopping watches with watch images as imgSrc, name of the watch as title ar About the information of watch like cost and warranty as description.

OUTPUT:
